1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-31 and 43-52, drawn to a sexual enhancement device, classified in class 600, subclass 38.
 - II. Claims 32-42, drawn to a method of manufacturing or assembling a device, classified in class 29, subclass 700.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another materially different process such as injection molding the whole device, then making openings for the vibrator.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
